

BRUNSON INSTRUMENT COMPANY

ISO 9001: 2000 Certified

Movers don't have to be Shakers.

The NEW Brunson TetraLock™. A stand so light, the airlines will hate you.

The new Brunson TetraLock™ stand shatters the notion that an instrument stand has to be heavy to be sturdy. Even better, the TetraLock™ proves that a lightweight, rigid stand can be an affordable convenience as well.

Featuring a base weight of under 20 pounds, the Brunson TetraLock™ is a pleasure to transport and use. The unique structural geometry of the tetrahedral design provides extreme rigidity. Cam-style leg adjuster locks firmly into position, allowing easy height adjustment. There's no center column needed for additional support, reducing weight. Rapid set-up and tear-down helps make quick work of measurement tasks.

Best of all, it's a Brunson.

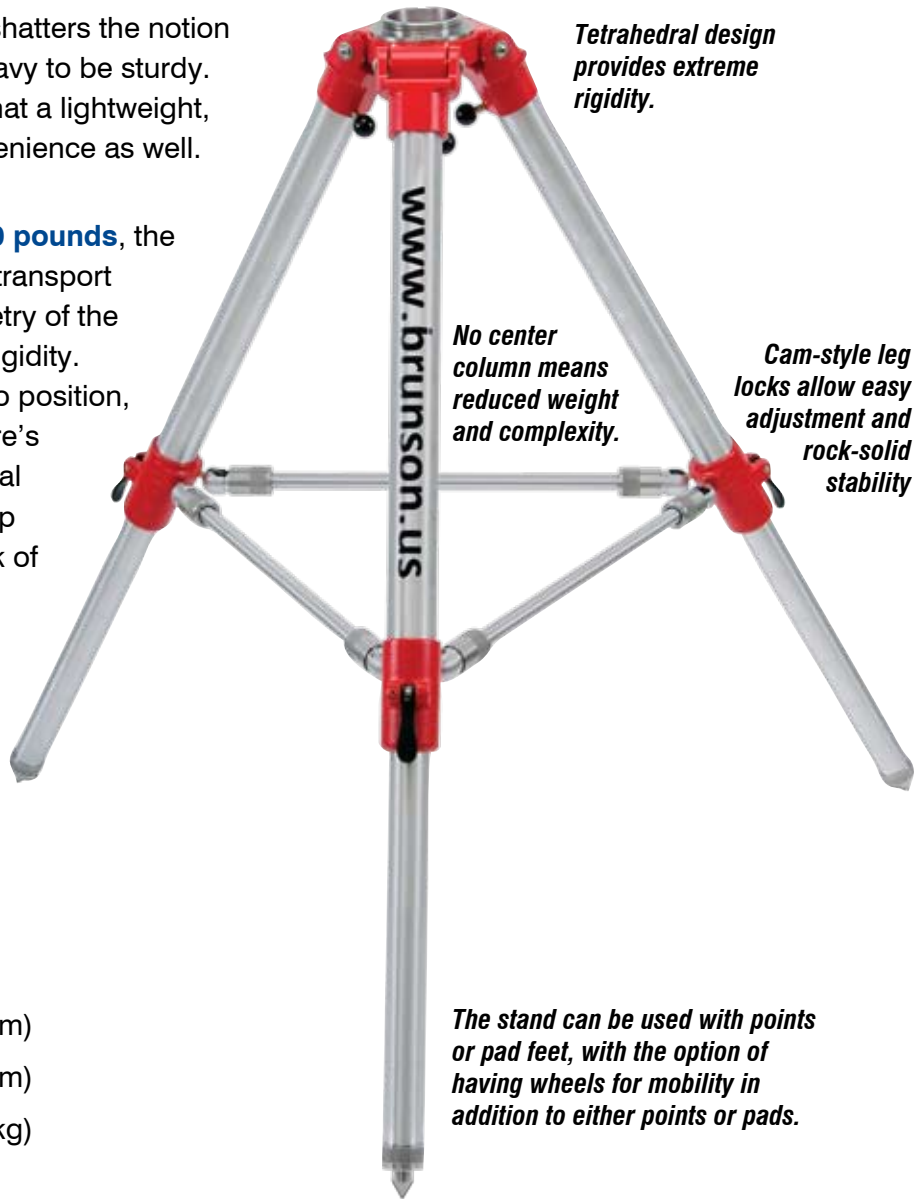

With an unmatched history and reputation for quality, you'll be able to work with confidence that your instruments will be secure and your measurements reliable.

Specifications:

Maximum height 47" (119 cm)

Minimum height 28" (71 cm)

Base weight..... < 20 lbs. (< 9 kg)

Tetrahedral design provides extreme rigidity.

No center column means reduced weight and complexity.

Cam-style leg locks allow easy adjustment and rock-solid stability

The stand can be used with points or pad feet, with the option of having wheels for mobility in addition to either points or pads.
